

Color Variants VL414112 stainless steel Width 15.5 cm

Optional accessories

AA400510

Window contact switch

AA414010

Ventilation moulding for VL 414 next to gas appliance.

Installation Accessories

AD410040

Flexible connecting piece for VL 200 / VL 414 DN 150 flat

AD851041

Connecting piece VL 200 / VL 414 for extension with flat duct DN 150 for extra deep worktop

VA420004

Connection strip for combination with other Vario appliances of the 400 series for flush installation

VA420010

Connection strip for combination with other Vario appliances of the 400 series for surface installation

VL414112

Vario downdraft ventilation 400 series

stainless steel

Width 15.5 cm

Air extraction/recirculation

Motorless

Can be combined perfectly flush with other Vario appliances of the 400 series Precision crafting of 3 mm stainless steel

Solid stainless steel control knob Highly efficient, low noise ventilation system especially with remote fan unit AR 410 110

Function for automatic, sensorcontrolled power adjustment depending on the build-up of cooking vapours

Low planning and installation effort

Output

Power levels depend on the remote fan unit.

Features

Control knob with illuminated ring included in delivery.

Three electronically controlled power levels and an intensive mode. Automatic sensor-controlled performance adjustment of the ventilation system.

Automatic sensor-controlled or manual run-on function.

Large-scale metal grease filter with high grease absorption.

Removable, dishwasher-safe grease filter unit.

Grease filter and activated charcoal filter saturation indicator.
Airflow-optimised interior for efficient

air circulation. Interval ventilation, 6 min. Enamelled ventilation grille,

dishwasher-safe. Air exhaust bend included in delivery. Overflow 250 ml capacity.

Cooktop-based ventilation control (with suitable cooktop).

Home network integration for digital services (Home Connect) either via cable connection LAN (recommended) or wireless via WiFi.

The availability of the Home Connect functionality depends on the availability of the Home Connect Services in your country. Home Connect Services are not available in every country – for further information please check: www.home-connect.com

Product rating

Consumption data is referred to a configuration with the remote fan unit AR 403 122.

Energy efficiency class A+ at a range of energy efficiency classes from A+++ to

Energy consumption 40.4 kWh/year. Ventilation efficiency class A. Ilumination efficiency class -. Grease filter efficiency class B. Sound level min. 57 dB / max. 71 dB normal mode.

Planning notes

For each VL one remote fan unit is recommended.

Maximum cooktop(s) width between two VL: 80 cm except with the CX 482. Vario cooktops like Vario electric grill and Vario gas wok should be placed between 2 VL.

For optimum performance in air recirculation we recommend an outflow surface area of at least 400 cm².

Characteristics

Product name/family

Color chimney

Typology Downdraft

Approval certificates

Australia Standards, CE, Eurasian, G-Mark, Ukraine, VDE

Length of electrical supply cord 175

Required niche size for installation (HxWxD)

Height of the chimney

Height of product, without chimney Minimum distance above an electric hob

Minimum distance above a gas hob

Net weight

Type of control

Electronic

Number of speed settings

Maximum output air extraction

Boost position output recirculating

Maximum output recirculating air Boost position air extraction

Number of lights (Stck)

Noise level

71

Diameter of air outlet

150

Grease filter material

EAN code

4242006286019

Connection rating

10

Fuse protection

Voltage 220-240

Frequency

50; 60

Plug type

Installation type

Built-in

Consumption and connection features

created on 2022-06-15

If operated next to gas appliances, the air baffle AA 414 010 is recommended to ensure maximum performance of the cooktop.

Appliance can be snapped into the worktop from above.

Depending on the type of installation (surface-mounted or flush-mounted), the specific location of the cut-out and the knob positions may vary. If combining several Vario appliances of the 400 series, a connection strip VA 420 must be placed between the appliances. Depending on the type of installation, the corresponding connection strip must be provided. The bearing capacity and stability, in the case of thin worktops in particular. must be supported using suitable substructures. Take into account the appliance weight and additional loads. Additional instructions for flush installation:

Installation is possible in worktops made of stone, synthetics or solid wood. Heat resistance and watertight sealing of the cut edges must be observed. Concerning other materials please consult the worktop manufacturer.

The groove must be continuous and even, so that uniform placing of the appliance on the gasket is ensured. Do not use discontinuous lining.

The joint width may vary due to size

The joint width may vary due to size tolerances of the combinations and of the worktop cut-out.

When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the hood's power supply line needs to feature a suitable safety switch.

Please read additional planning notes on page xx.

Connection

Total connected load 10 W.
Connecting cable 1.8 m with plug.
Plan a LAN cable.

Power consumption standby/display off 0.2 W.

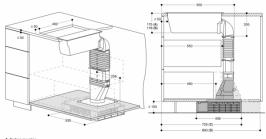

Please check the user manual for how to switch off the WiFi module.
